Re: Linda Stingley

Dear Stephanie Zepelin:

The Teachers Health Trust (THT) takes the unique health matters of each educator and their family to heart. We take great pride to creating solutions when complex medical circumstances arise.

In this particular case, the THT Complex Care Team was able to coordinate an appointment with a specialist at UCLA on February 8th for the patient. Our records indicate that the patient received all of the care necessary. We continue to work with the patient and her family to insure her needs are taken care of and addressed.

Providing access and quality health care to educators and their families is the top priority of the Teachers Health Trust (THT).

Sincerely,

Teachers Health Trust
Board of Trustees
