Inspection Violations

No violations cited.

Inspection Temperature Observations

No Temperature Observations

Overall Inspection Comments

Surveyed facility to respond a reported back up sewage at the outside of the restaurant by EHS Bruno Stephani. Upon arrival, a strong smell from the kitchen. The sewage back up was at the trash disposal area, Solid waste EHS had already had the facility self close until issue is fixed. American Jetting Services is the engineering company that facility is using, the engineer states that the sewage did not go through the kitchen due to the facility having separate lines. No sewage back up was observed at the cook line or prep area, however when the lines were being jetted 3 drain lines in the back area of the kitchen flowed with sewage. Engineering states that that is due to the fact that they used too much force to unclog the lines, and that they were still draining properly and not back up. PIC was asked to demonstrate if the drain lines were still in proper operation, water was run at the top and was draining properly. Facility has been instructed to clean and sanitize facility and the outside area with the proper concentration of bleach.

Once facility has done all the proper cleaning and Solid waste has approved to reopen, PIC should contact EHS from food operations for a reopening for the restaurant as a whole.
