			·	RVATIONS AND CORRECTIVE ACTIONS								
Item		servations & Corrective Action										
1	Violatio	on: Operating outside the parame	eter of the health permit.									
	Observation: Restaurant has only one (1) toilet facility in establishment. There are thirty (30) seats with eight (8) tables; one (1) small round table with two (2) seats is used outdoors in front of restaurant, according to owner.											
	Owner states he has owned facility for fourteen (14) years with this seating number; purchased from previous owner who also had greater than 9 seats. Facility is decades old. Owner was informed about the seating restriction in relation to toilet facility requirement: nine (9) seats or less, one (1) toilet facility; greater that 9 seats requires two (2) toilet facilities. EHS discussed option of applying for an SNHD waiver to allow for current seating with one (1) toilet. Correction: Greater than nine (9) seats requires two (2) toilet facilities in a food establishment with sit down seating provided. Reg. Ch. 5 Owner wants to pursue the waiver option; given five (5) business days to begin process of applying for a waiver, by May 25, 2018. Permission granted to continue operating under current seating and toilet facility conditions until outcome of the waiver is determined; approval received from Spring Valley Supervisor Carol Culbert.											
11	NOTE: Clark County Business License document states Type of License: Restaurant - Category 2 (seating for 12 or more).											
	Violation: Storing raw animal products next to or over cooked or ready-to-eat foods. Inspector Observation: Improper food storage in three (3) door reach in "True" cooler: 1. Ready to Eat (RTE) packages of flour tortillas stored next to flats of raw (unpasteurized) eggs on bottom shelf. 2. Raw whole muscle pork stored next to raw chicken in metal bowl on bottom shelf. Both were corrected on site (COS) according to appropriate cooking temperatures. Corrective Action: Protect food from contamination. Store raw animal products under or away from ready to eat foods; store raw animal products according to final cooking temperatures and with RTE foods on very top shelf of cooler. (3-302; 3-304; 3-30)											
Over		<u> </u>	and with INTE 1000S OH V	ery top shell of cooler. (3-302, 3-303, 3-304, 3-30)								
Overall Inspection Comments: NOTES: 1. Requested reinspection from closure that occurred on 5/15/208 due to Imminent Health Hazard (sewage not disposed of in an approved manner) AND forty one												
(41) demerits. 2. Approved to resume operations with an eight (8) demerits Grade A; grade card issued and closure sign removed. Spring Valley Supervisor Carol Culbert notified.												
3. Facility had more professional plumbing service (from the same plumber who made recent repairs) later in day after EHS Lin's morning survey on 5/17/18; NV Plumbing LLC. Company provided Commercial Major Jetting service and commercial sewer camera inspection.												
4. NV Plumbing LLC plumber, Roberto Rangel, made a site visit to meet with EHS Lin and to discuss most recent service work done at facility.												
5. Facility is scheduled for Food Safety Intervention Training with EHS Larry Navarrete on Monday, May 21 at 8:30 am, at the restaurant.												
6. Discussed with owner the facility's history of not passing routine inspections over the past several years (earning Grade B repeatedly). This is the reason why Food Safety Intervention is required; to address these risk factors so that changes can be made to ensure food safety compliance.

What should I do if an imminent health hazard occurs at my food establishment?

Immediately notify the health district and voluntarily discontinue operations. The health district will discuss the hazard with you and may approve a contingency plan. {8-204.12(f)}

If you fail to notify the health district and continue operations during an imminent health hazard, you will be issued a cease and desist order. You will also be assessed fees and required to pass an inspection, with fewer than 10 demerits and no identical repeat critical or major violations prior to reopening.

If your facility is closed for excessive violations with a history of non-compliance, including repeat critical or major violations, you may be required to attend a supervisory conference before an inspection to reopen the facility. Additionally, you will be required to pay all applicable fees before the inspection.

When in doubt, contact the health district food inspection operations office that inspects your establishment.

What is an imminent health hazard? Examples include, but are not limited to:

- Fire
- Flood
- No hot water
- No water
- Power outage
- Inadequate refrigeration
- Sewage backup
- Misuse of poisonous or toxic materials
- Onset of a suspected foodborne illness outbreak
- · Pest infestation
- Gross unsanitary occurrences or conditions, or other circumstances that may endanger public health

Please contact SNHD if you encounter an imminent health hazard at one of the following numbers:

- Food Operations General Contact Number
 - 702-759-1110 Desk
- Larry Rogers Food Operations Manager
 - 702-759-0837 Desk

If a hazard occurs outside our regular business hours, call our 24-hour phone number (702) 759-1600, choose the Environmental Health option and then press '1' to speak with an after-hours inspector.
