Inspection Violations

No violations cited.

Inspection Temperature Observations

No Temperature Observations

Overall Inspection Comments

Manager contacted SNHD inspector by phone on morning of 6/6/18 to request survey to remove red tag from dish machine. Manager indicated that machine was operating correctly and that a new bucket of sanitizer was obtained to resolve issues observed during inspection on 6/5/18. At time of survey, the dish machine was not properly repaired to deliver sanitizer solution. Dish machine cycled three times with no sanitizer solution present. Equipment to remain red-tagged. You may not use the red tagged equipment until it is repaired AND inspected/released for use by SNHD. The consequence for using the equipment prior to approval is an automatic downgrade. Call (702) 759-1110 to schedule a survey for equipment inspection. (4-202.12; 4-202.13; 4-204)

Report reviewed by phone with manager. Owner would not sign report and inspector had to wait while air was removed from line. Dish machine cycled three additional times. Sanitizer solution still reading at 0 PPM. Documentation of professional service will be required to be verified by SNHD before next survey request to remove red tag.
